1st Malaysian Paediatric Movement Disorders Symposium

Preliminary Programme

Organized by:
Chapter of Child Neurology and Developmental Paediatrics
Dear Colleagues and friends,

We are pleased to invite you to participate in this exciting 1st Paediatric Movement Disorder Symposium in Malaysia.

Being the first of its kind in this region, this occasion would present an excellent opportunity to unravel the secrets of movement disorders in children; more so with the presence of two renowned experts in this field, Prof Jonathan Mink (USA) and Prof Russell Dale (AUST).

Pediatric Movement Disorders, is a field that deserves more attention in this part of the world. Many children present with myriad of movement disorders of variable severity, some treatable while others serve as templates for diagnosis of the primary disease. Failure to recognize this, would be a deterrent for any effort in managing a child with such presentation.

This workshop, is aimed to introduce Pediatric Movement Disorders to healthcare professionals from different facets in our medical community. The symposium is designed to be mostly interactive, with lots of exciting video based teachings, interactive lectures and case presentations.

We look forward to welcoming you to Malaysia in May 2015.

Tajul Arifin Bin Tajudin (Organizing chairman),
Feizel Alsiddiq
**Purpose/Objective**

- To improve the awareness to paediatric movement disorders
- To facilitate recognition of different types of movement disorders in children
- Disseminate current knowledge on paediatric movement disorders
- Exposing paediatricians, physicians and junior practitioners to paediatric movement disorders

**Target audience**

The target audience include senior medical residents, paediatricians, neurology fellows / trainees, paediatric & adult neurologists and other healthcare professionals

Topics

Overview of paediatric movement disorders
Movement Disorder Identification
Benign movement disorders in children
Tic Disorders
Autoimmune Paediatric Movement Disorders
Childhood stereotypic movement disorders
Movement disorders in child Cerebral Palsy
Genetics in Pediatric Movement Disorders
Cognition and movement disorders in children
Psychogenic Movement Disorders
Paroxysmal movement disorders
Update in management
Speakers
1. Prof Jonathan W.Mink, MD,PhD
   Professor of Paediatric Neurology
   University of Rochester Medical Centre, New York, USA

2. Prof Russell Dale, MD,PhD
   University of Sydney, Sydney, Australia

3. Dr Tajul Ariffin
   Hospital Sultan Ismail, Johor Bharu

Venue

- ALOFT KUALA LUMPUR SENTRAL HOTEL
  (ALOFT Kuala Lumpur - is situated in KL SENTRAL, which is easily accessible by train; 28 minutes train ride from KILA airport)

Other informations
- The official language will be English
- Guideline for case/video presentations will be announced by March

Abstract

Guideline for video presentation (Meet the experts session):

Abstract submission:
Language of presentation: English
Presentation format: oral with videos
Abstracts should be submitted in English.
The abstract should be divided into succinct sections for "Clinical presentation, Investigations, Movement, Imaging, Impression “
Abstracts should not be more than 250 words.

Presentation guidelines:
• Each presenter will have 8 minutes to present their case
• Presenters are not allowed to bring the their patients
• All videos should be clear and pruned to a duration of 1-3mins
• The videos should focus on the region or movement to be discussed
• Presentations should carefully exclude information, such as hospitalization dates or other personal information, that could be used to identify individuals unless it is important for the diagnosis
• If the content infringes upon patients' personal information, informed consent must be obtained from the patient or their representative and the presentation must carefully avoid identifying any individuals
• Advised to bring your own computers or devices for video sessions
